PICKPOCKETS CAUGHT,-As Mr. John J. Maney Pickfockers Caught.—As Mr. John J. Maney of No. 189 Eldridge street was proceeding down Broadway in the vicinity of Houston street, his attention was attracted to three suspicious-looking individuals, whose movements he concluded to watch. Shortly afterward he saw one of the parties attempt to pick a lady's pocket, and subsequently one of the mane, who gave his name as James Johnson, put his hand into mane, who gave his name as James Johnson, put his hand into the pockets of another lady's diress and abstracted something, and passed over to a companion calling himself Michael Cas, and passed over to a companion calling himself Michael Cas, and the same than the lady that had been robbed (Miss Lucy H. Brayton of No. 4 Union street, South Brooklay), and inquired whether she missed anything from her pockets. On examination she ascertained that her pocketbook, containing benk bille and diver coin to the amount of \$34, had been stolen from her; wherengon to the amount of \$34, had been stolen from her; wherengon Mr. Maney pursued the young pickpockets and caused the arcest of two of them, Johnson and Coscilia. The latter stated was a latter. Johnson and Coscilia. The latter stated the was 19 years old, resided at No. 194 Bayard street, and was a latter. Johnson represented that he was a native of Buffalo, 17 years old, resided in West Broadway, and was by occupation a painter and paper hanger. The offenders were taken before Justice Davison at the Jefferson Market Police Coart, and committee for examination.

MORE CHURCH DIFFICULTIES IN THE METHODIST

SECT.
William D. Berrian agt. The Methodist Society in the City of

New York.

This was a motion to set aside a judgement rendered against the defendants for moneys advanced by Cornelius Berrien for these defendants, amounting to about \$2,500. The motion was made upon the ground that Cornelius Berrian, alleged to be the President of the

also. The motion was made upon the ground that Cornelius Berrian, alleged to be the President of the corporation, was not at the time of the service of the summons and complaint, the President of the Board of Trustees, and that therefore the suit was not properly commenced. The trustees of the Church are five in number, and the plaintiff claims that Cornelius Berrian is the President of the Board. The arguments of counsel threw some light upon the history of the Church. It appeared that this Church was originally composed of part of those members who in 1820 seceded from the Methodist Episcopal Church because of the too conservative views of the latter on the subjector Slavery. They made a code of laws or discipline nearly resembling that of the Church from which they seceded, and matters went smoothly until 1833, when the Rev. J. M. Smith, the then pastor, having occasion to use the discipline, expelled a Mr. Jarvis from the church, whereupon it is alleged, Jarvis collected together a number of persons, and in the absence of the Rev. Mr. Smith, went through a mock trial and declared Mr. Smith's ministerial position in that church vacant, appointing another minister to occupy his place. The Conference in the mean time annually appointed Mr. Smith pastor of this church till is Street. Mr. Berrian sustains Mr. Smith. The plaintiff alleges that Jarvis by violent means attempted to drive Mr. Smith from the pulpit, and at the time appointed for the election of trustees, took forcible possession of the church, and drove the voters away; and that being debarred the use of the church by violence, they repaired to the residence of Mr. Smith and there elected their trustees. It is also said that Jarvis and his party since that time have forcibly kept possession of the church, and drove the voters away; and that being debarred the use of the church by violence, they repaired to the residence of Mr. Smith and there elected their trustees. It is also said that Jarvis and his party since that time have forcibly kept possessi

vis party being in actual possession of the church, and claiming to be the trustees, were trus-

tees de facte, and that their president should be served with the process, and not Mr. Berrian. Plaintiff's counsel insisted that Mr. Berrian and his associates being de facto members of the church, while the other party were not, Mr. Berrian should be considered as the legitimate President of the only legal Board of Trustees. If the other party had, by force or numbers, driven Mr. Smith and his friends "to d" rock of the occan or to the sands of the desert, they would still be the Church, as a continued trespass or usurpation would confer no powers upon the wrong-doers. The question as to who constitute the church, he said, was not to be determined by members but by the discipline of the church and the conformity or non-conformity of the parties to that discipline. To this point the counsel cited the case of the People ex rel. Steele agt. The Trustees of Centenary Church, reported in 2 Barb., 397, and the Laight-street Baptist Church agt. Noe and others, 12 Howard's Reports, 497. The case was on argument several days last week, and the papers were submitted to the Judge, who reserved his decision. COMMERCIAL MATTERS.

SATURDAY, May 9-P. M. There was a fair amount of activity at the morning Stock Board, but the market at the Second Board wa exceedingly dull. Neither bulls nor bears appeared disposed to operate. The principal business at the Second Board was in Michigan Southern, which promises to take its place as one of the most active fancies on the list. There is a considerable amount of orders for buyers' options, while the operators for a fall are pressing the market freely with their options. It was offered at 64, at six months; 624, seller six months, while 66, buyer six months, was bid for 1,000 shares. The closing price was 631 264. Erie was heavy, with small transactions. It closed at 41 , a decline of ? P cent. A portion of the decline was due to a rumor that the receipts of April were \$125,000 behind last year, and that May thus far does not show any gain. Reading shows a decline of 1 ? cent, and New-York Central 1 ? cent. The April receipts, we learn, will show but little variation from April, 1856. Among the firmest stock to-day was Illinois Central and Cleveland and Toledo. Both stocks are scarce while there is still a considerable short interest in them. The former improved to 1354, and the latter 691. Galena continues to recover from the late decline and sold at 99. The April earnings are \$1,400 less than in April, 1856. Panama was strong. Ohio Trust improved to 99. A small sale of Nicaragua was made at 6, seller 60. Harlem is not sustained, and fell off to 151. In Railroad Bonds and State Stocks the transactions were trifling. As a whole, the market, as compared with a week ago, shows a decline. Cleveland and Toledo, Illinois Central and Michigan Central have been the only exceptions. The decline in the

eading stocks is as follows: Michigan Southern.... Galens....

ness. We heard of but few outside orders, and most of those we hear of are to sell Stocks. The business in Exchange done for the steamer to

day was quite light, and quotations are heavy.

Freights to Liverpool are dull and nominal. We hear only of an engagement of 900 bales Cotton at 2s. 22s. 6d. P bale. To Bremen, 100 bales Cotton at 3s. 8d.; 500 bbls. Rosin at 2s. To Retterdam. 1,500 bbls, Rosin at 2s. 6s. To London and Glasgow we learn of no engagements. A brig of 230 tuns to Porto Rico and back, with Sugar at 40c., and Molasses at \$3. Schooner Moller, 160 tuns, was engaged for the Gulf trade at \$700 per month. The brig Hesperius 180 tuns, was chartered for Port-au-Prince for \$1,700 A brig to load lumber from Washington to Porto Ricco at \$9, and back with Sugar at 40c., and Molasses at \$3.

The business of the Sub-Treasury was: Receipts, \$187,198 35; Payments, \$170,744 09; Balance, \$14,229, 454 44, against \$14,408,112 last Saturday, showing a gain to the street of \$178,658. A: \$50,000 of the receipts came from the Mint, the street gain is really \$128,658. We annex

Under the above drain and some amounts which the domestic exchanges have taken from us, the Bank statement of Monday will doubtless show a loss in the specie line. Meanwhile, another California delivery will probably be made on Wednesday or Thursday next.

There was marked ease in the Money market

active one than the previous, and rather more difficulty has been experienced in finding facili ties. The banks, as far as we can learn, are disto extend their call loans on stocks. The offerings are generally large. We hear of two or three instances where money has been left with leading stock houses on deposit, at 6 per cent., but the current rate is 7 per cent. There is no change in paper. The discount houses have but small amounts of first class names, which go at 7d9 per cent. The principal business is done at 8@9 per cent. The interior, we learn, is paying up well where notes have been given payable at bank, but in the case of open accounts, the northwest is to some extent delinquent. The land speculations have absorbed immense amounts of funds which belong to New-York merchants.

Albert H. Nicolay's regular semi-weekly sale of stocks and bonds will take place on Monday next, the 11th inst., at 121 o'clock, at the Merchant's Exchange. The Western roads generally do not make a very favorable show in their April traffic. The Chicago and Rock Island is, however, an exception. The earn

Redfield, 500 shares additional, &c. There is no doubt that the whole amount will be subscribed for as soon as the circulars have reached the interior stockholders. One per cent was offered to-day for a stockholder's privilege of subscribing.

The following is a copy of a telegraphic dispatch

The following is a copy of a telegraphic dispatch from Albany received this morning:

Albany, May 9—11 o'clock A. M.

"So far as we can learn there are no serious obstructions to canal navigation. Our boats are moving freely, and there have been arrivals from beyond Utica."

Communications received at the Canal Department, dated Dansville, May 6, announce two serious breaks in the Genesee Valley Canal.

The Controllar Mr. From beginning dispatch of the controllar Mr. From beginning the controllar of the controllar of

The Controller, Mr. Flagg, having succeeded in eclling a considerable amount of Revenue Bonds the city has resumed payment. We trust some measures will be adopted to prevent the recurrence of such a disgraceful state of thing as has obtained for the past month. The city deposits should be placed in the banks that have the ability and influence to maintain

the city credit with any needed amount of advances.

The consolidation of the two roads between Chicago and Milwaukee goes into effect on the 20th inst. after which they will be worked as one corporation. The terms of consolidation are left to Mr. Hubby of Cleveland, Columbus and Cincinnati Road, Mr. Worthen, formerly of the New-Haven Road, and Mr. Harris of

Springfield. The statement of the New-Albany and Salem Road. just published, gives the boating debt at \$350,000, which they have no means to pay. The business of the year has fallen short \$156,000 of the estimate, and the Company asks further indulgence from the bondholders. The earnings for the six months ending 31st December were \$419,506 33 Expenses, &c 223,034 65

This is on a general account of over \$8,000,000. The capital stock is \$2,267,790 and the debt is \$5,549.-164. The net earnings above have been used up in repairs and paying floating debt. The interest on the bonded debt is in default. The first mortgage of \$3,000,000 does not, according to the report, cover the rolling stock. The President makes the annexed suggestions in regard to relieving the road from its emarrassments :

If the mortragees should foreclose their mortgage on the road, they have no machinery or anything to work them with, unless they purchase the interest of the mortgages which come after them.

Under these circumstances three courses are left for the bendholders.

Under these circumstances three courses are left for the bondholders.

The first is to agree that the road should remain as it is, and work itself out of its difficulties, which it would do, perhaps, so as to be able to resume on the 10 \$\psi\$ cent bonds on the 1st of October next, and on the 8 \$\psi\$ cent by May, 1858.

Or, if the bondholders feel indisposed to leave the road under the circumstances, in the hands of the stockholders, the Board will agree to deliver it up to a trustee, or trustees, to be worked say from five to seven years. The first earnings to be paid over to the first mortgage bonds. The other bonds coming in in the order of their claims, provided the money is advanced to pay the debt named above. And it shall be understood that when all the arrearages shall be paid up, that the road shall again be delivered up to the stockholders.

paid up, that the road shall again be delivered up to the stockholders.

The last-named arrangement would give to the holders of the first mortgage all the advantage of their prior lien, and also the use of the rolling stock, &c., which belong to the other bondholders.

The second and third mortgage and income bonds would have the advantage of making their claims good by yielding up temporarily the claim they now have on the machinery, &c.

A third proposition is, to allow, by an amicable suit, the first mortgage to be foreclosed, making the second and third mortgage and income bonds into new stock, upon such terms as may be agreed upon, provided the first mortgage will subscribe enough additional stock to pay off the debt named. Either of these propositions, I think, would be agreed upon by the Directors of the Company.

of the Company.

They have no disposition to take any course to prevent the creditors from realizing their claims; and they vent the creditors from realizing their claims; and they feel confident that the property of the road is more than sufficient to do that. than sufficient to do that.

But they would not consent to have the first mortgage bondholders sacrifice the road, to the exclusion
of the mortgages that come after them, and the other

We do not exactly see the equity of the decision expressed in the last paragraph of the above extract. If first mortgage bondholders cannot take possession of a road to the exclusion of the mortgages coming after them, then the distinction between mortgages is only imaginary, and a first mortgage bond is worth no

more than a third or fifth mortgage bond. Of course the very intention of a first mortgage is to give priority of lien, and the first mortgage bondholders, if disposed to press their claims to a foreclosure, would scarcely, we presume, ask the consent of the Company to their action. The Philadelphia Ledger says:

The Anthracite Coal trade for the past week has The Anthracte Coal trade for the past week has not been as large as was generally expected, in consequence of the recent freshet in the Schuylkill. The Reading Railroad brought down for the week ending on Thursday, 33,840 tuns, and for the season, 624,314 against 652,777 to corresponding time last year, showing a falling off of 28,463 tuns. The Schuylkill Navigation brought down for the week ending on Thursday only 20,389 tuns, and for the season, 142,406 against 143,343 tuns to corresponding date last year. From the Schuylkill region the total quantity is 29,399 tuns less than to the same time last year, notwithstand. From the Schuylkill region the total quantity is 29,399 tuns less than to the same time last year, notwithstanding the Canal opened some three weeks earlier this year, and the tunnage of the Reading Company was at one time about 70,000 tuns ahead of last year. The coal tunnage of the Lehigh Canal to May 2, is 13,844 tuns less than last year, while that of the Lehigh Valley Road is 99,644 tuns in excess. Of this quantity more than 75,000 tuns was transported before the opening of navigation, and a very large proportion of it was consumed on the line. Previous to the opening of that road, large supplies of coal had to be accumulated in the Summer and Fall for the Winter consumption of the furnaces and consumers of the

Lehigh Valley. The facilities of the road last Winter Lebigh Valley. The facilities of the road last Winter rendered this unnecessary, and, as compared with other years, a large proportion of that tunnage should be regarded as belonging to last year. It may, therefore, safely be assumed that the quantity brought to tidewater, for shipment, from the two principal coal regions, is 30,000 tuns less than to the same period in 1856. Should the shipments continue small for a few weeks longer, and the consumption continue to increase as heretofore, there is cause for apprehension that the demand cannot then be supplied, and if any serious accident should occur to either of the works of the carrying companies, it would cause the prices of coal to rule very high as the season advances.

The Lehigh Valley Railroad reports, for the week ending on Saturday last, a tunnage of only 8,165 tuns,

ending on Saturday last, a tunnage of only 8,165 tuns, and for the year 122 081 tuns. Shipments of Coal on the Lehigh Canal for the week ending with Saturday the Lehigh Canal for the week ending with Saturday last were 19,326 tuns; for the season, 43,332 tuns against 57,205 tuns to same time last year. It has been ascertained that the injury to the Delaware Canal is not so great as was at first apprehended. In the five mile level, just below Easton, there are three small breaches, neither of them below canal bottom. At Uhler's Locks a small piece of vertical wall has fallendown; at Rocky Falls, eight miles below Easton, the top of the towing path is washed into the canal. This is pretty much the whole extent of damage. A large force is already at work, and the repairs are expected to be completed in two weeks. Neither the Lehigh nor the Morris Canal has suffered, and shipments will be resumed from the various points on the ments will be resumed from the various points on the former canal so soon as the water has fallen sufficiently to allow of the boats being loaded. Until navigation on the Delaware Canal is restored, consignments for the New York markets will, to some extent, be made by the Morris Canal.
